*Observers state the object had a flight path of,
"WEST TO heading of 120° SE. THEN TURNED SOUTH TO 180° hdg.
THEN TURNED AGAIN TO North hdg. DISAPPEARING OVERHEAD." This
is an ~~inconsistent~~ inconsistent statement. Observer first
sighted object in the SE on a 120° heading. All this
is very confusing.*

*Other, although
this UFO suggests
an astronomical sighting,
because of the actual small
size of the object, and the
fact that it was seen
for five days straight
with no other report
on the sighting. Sources
statements are inconsistent*
